

We are looking to grow our product development team!

Electrical Engineer, Senior (m/f/d)

full-time position

For over thirteen years Flexoptix has been a successful provider for transceiver solutions. With over 60 colleagues, we occupy a growing niche market that we have successfully disrupted and defined through our unconventional take on things.

You will be part of our development team, not just limited to hardware development using the latest technologies, but also finding new challenges, as well as solutions for our company.

We hope for your support with:

- Development and support of our products
- Product design, component selection, (digital) libraries, layout, routing
- Product certifications for international markets (EMC, product safety)
- Coordinating and supporting external hardware partners
- Technical documentation
- Bring-up testing

What you are offering to us:

- Passion for embedded systems, ideally you contribute to **open-source** projects
- You are knowledgeable in the whole product development lifecycle
- Your own **remote workplace**, since we're on a pandemic remote working schedule
- The ability to work at the office in **Darmstadt** once the pandemic isn't a challenge anymore
- Willingness to shape our **self-organizing** team
- Experience with Altium Designer
- Solid understanding of design and prototyping (CAE, ECAD)
- Basic programming skills
- You are pleased that everything is committed through **git** and you would like to help us with the documentation in our **Atlassian** products

What you can expect from us

We are a pragmatic bunch of cowboys who like to think outside the box, which helps us to find creative solutions for technical problems. We offer a lot of freedom as well as opportunities to influence our processes, though with great power comes great responsibility. This freedom also includes the choice of tools and materials, as well as ways of personal development (conferences, workshops, teachings, webinars).

Apply now!

Please send your application to the HR department for an initial chat: jobs@flexoptix.net. We are looking forward to meeting you in person. 😊
